CSR MANIFESTO

BUILDING A BETTER FUTURE TOGETHER

At arena we recognize that everything we do has an impact on the planet we live on, as well as its people.

We strive to help create a future that continues to allow everyone to enjoy swimming and water sports in a healthy environment.

That's why we're committed to having a positive impact on you, the environment and our communities, inspired by our passion for sports and life in and by the water, our most abundant natural element.

As a leader in the sports realm our commitment to 'responsibility' represents the conscious and effortful way in which we plan to measure our footprint and invest in our planet.

arena's products are designed to help and inspire people to be active and to move towards the best version of themselves by being healthier and connected to nature.

As part of that philosophy, quality and durability are key considerations in our design process in order to guarantee that our products are long-lasting and don't need to be replaced frequently, thus reducing waste.

We choose partners who share our values and, like us, invest in both the planet and its people.

We care about the well-being and rights of employees working in the manufacture of arena's products and are committed to being transparent about our partners and policies.

We support local communities and promote water-sports through sponsorship and collaboration with national sports federations, sports teams, and international governing bodies.

We are an equal-opportunity employer and value diversity ensuring equal treatment for all our employees across the globe.

The arena brand was born in water, and for over 50 years has thrived in its element.

We've learned that to do so requires courage, responsibility, and action, and we remain resolute in our desire to give everyone the opportunity of living their deep connection with water: that feeling of freedom and peace, joy and profundity we all experience in and by the water.

RESPONSIBLE PRODUCT

To design and manufacture all products in a progressively more environmentally conscious way is a key step in the commitment we have taken.

We are constantly working to develop more sustainable garments and accessories to reduce our environmental impact, while still guaranteeing the same distinctive performance, protection, style, comfort and fit that sets arena apart. This commitment led us to launch in the market the first FINA-approved racing suit made with recycled yarns, Powerskin ST NEXT.

According to recognized international certifications, these sustainable fabric sources include PET plastic bottles and industrial waste such as yarn and chip waste.

By working with recycled PET, nylon, silicone and polycarbonate, we are reducing the use of plastic and petroleum-based resources without sacrificing the benefits and characteristics of the fabrics.

RESPONSIBLE TEXTILE PRODUCTS OVERVIEW BY SEASON

Percentages were calculated on the basis of the total number of styles with recycled yarn per season.

* (FW23 vs FW22) In FW23 Sportswear collection has been optimized therefore the % of recycled styles were lower due to a decrease of total n. of styles.

RESPONSIBLE PACKAGING

The mark of responsible forestry

All the elements necessary in the delivery of products to the consumer have an impact on the environment. To reduce this impact, we are now using sustainable materials for our packaging (hangtags, pouches, polybags, boxes, etc.).

FSC® certified cardboard is our choice for most packaging made of paper, and for the vast majority of plastic packaging, we use recycled plastic.

The FSC logo on our packaging

ensures that it has been made in compliance with rigorous environmental, social and economic standards, which aim to protect the world's forests and ecosystems that depend on them and respect local communities and the rights of workers.

This choice supports the mission of the Forest Stewardship Council®, an international NGO that has been promoting responsible forest management for over 25 years.

SUPPORTING NATIONAL FEDERATIONS AND TOP ATHLETES

“Since 1973, arena has prioritized strong connections with the most important swimming and watersports federations around the world, from grass roots to Olympic and Paralympic support.

National Federations play a critical and active role in the development of both amateur and elite watersports. We share their goal to grow watersports, increasing inclusivity and diversity and using sport as a driver for social wellbeing. We share their commitment to make the water accessible for people to relax, train and compete.

At the heart of the arena brand are its athletes, who are both key collaborators in the product development cycle and important ambassadors for the brand, upholding its values and expressing its authenticity.

Since Mark Spitz first teamed up with Horst Dassler in 1973, arena’s progression to the top of its field has always occurred in partnership with world class swimmers, whose voices are not only emblematic of the brand’s emphasis on quality, they’re also an inspiration for many, from the amateur who goes to the pool to stay fit and lead a healthy lifestyle, to those that mount the

Olympic podium, and not least the backroom staff who have helped craft and live the entity that arena has proudly become.

With its legendary sponsored team, arena is seriously chasing Olympic Gold in Paris continuing to rely on the brand’s emblematic Ambassadors such as Sarah Sjöström, Gregorio Paltrinieri, Florent Manaudou , Chad Le Clos, Cate Campbell, Florian Wellbrock, Kristof Milak and Bruno Fratus. Through the collaborations with Lydia Jacobi, David Popovici (both born in 2004), Kyle Chalmers, Louise Hansson, Thomas Ceccon, Nicolò Martinenghi and Noè Ponti, arena will be under the spotlight in Paris, while also generating renewed interest in the main events that precede it. This mix of experience and freshness allows the brand to consolidate its innovation, its authenticity and its passion through the young athletes who are helping arena to continue advancing day after day. Thanks to its magnificent athletes, over the next few years arena will be challenging for podium finishes at swimming’s most important international events.

POWERSKIN

DESIGNED WITH THE ELITE ATHLETES IN MIND

Powerskin is the benchmark for high performance gear, designed for all levels of competitions, achieved through years of research and testing.

Top athletes, sports scientists, swim coaches and industry experts are deeply involved in the development of its cutting-edge technologies, leading to podium performances around the world.

Powerskin stands for innovative materials and construction methods that reduce drag and enhance swimmers speed and efficiency, while delivering comfort and durability.

Every piece is the product of technological R&D that draws on an extensive international network of excellence and close collaboration with the world’s leading athletes who provide invaluable insight throughout the development cycle.

DISCOVER OUR ELITE TEAM

<https://about.aresport.com/en/athletes/>

FINA (INTERNATIONAL SWIMMING FEDERATION) HAS BECOME WORLD AQUATICS.

Fina approved products will carry either the “Fina approved” or the new “World Aquatics approved” Homologation label.

BOTH HOMOLOGATIONS WILL BE VALID AND EQUIVALENT.

POOL SWIMMING

PRIMO

THE WORLD'S FIRST TENSOELASTIC RACING SUIT.

Thanks to the revolutionary tensoelastic properties of the arena Hyperforce fabric, the Powerskin Primo provides powerful compression with minimal stretching. The fabric's extraordinary elasticity allows for 50% more stretch than standard fabrics, enabling a range of motion never experienced before. It delivers the highest overall compression and ultimate comfort.

Engineered with

>HYPERFORCE<
THE TENSOELASTIC FABRIC

FEEL THE INCREDIBLE

THE HIGHEST COMPRESSION,
THE ULTIMATE COMFORT.

PERFECT FIT

The first arena technical racing suit available in Long Torso sizes for a customized fit and less shoulder-strap pressure.

CORE STABILITY AND REAL-TIME FEEDBACK

X-Tape construction connects the hips to the upper body and provides sensory feedback on excessive torso rotation.

COMPRESSION MEETS FLEXIBILITY

Our most powerful compression combined with extraordinary elasticity thanks to the one-of-a-kind Hyperforce fabric: the first ever tensoelastic fabric.

SUPERIOR HYDRODYNAMICS

Flow channeling fabric technology improves surface drag and hydrodynamics on key surfaces.

ADJUSTABLE FIT

All-new construction and increased fabric elasticity allow a variable waist height from low to high.

STREAMLINED BODY POSITION

Double taped hamstring power bands and internal construction provide powerful support to lift hips and aid in leg extension.

APPROVED

THE POWER OF THE CARBON FIBER.

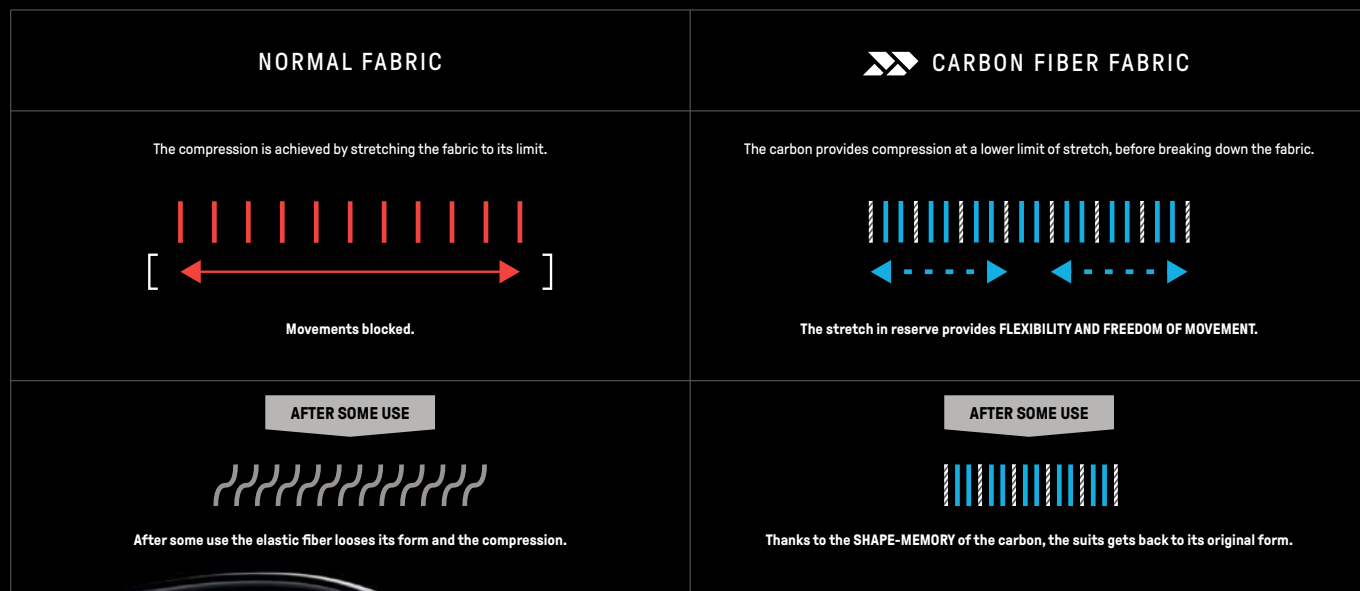

Flexibility, compression, durability. Together at last.

CARBON FIBER: THE SECRET BEHIND UNCOMPROMISING COMPRESSION AND FLEXIBILITY.

One fiber of carbon is 10 times stronger than steel and 80% lighter. That's why the Carbon Fiber is the ultimate material for performance and speed in everything from F1 cars to space shuttles. Following years of extensive research and development, arena has discovered a revolutionary way to integrate flexible strands of this extraordinary material into the fabric of all Carbon Series race suits, delivering unprecedented performance and strength without sacrificing flexibility and range of motion.

THE CARBON FIBER EFFECT IN A RACE SUIT

EVERLASTING COMPRESSION. UNPARALLELED RANGE OF MOTION.

BENEFITS OF THE CARBON FIBER:

FLEXIBILITY HIGH COMPRESSION

Carbon Fiber Technology compresses muscles with minimal fabric stretching. That leaves extra elasticity for excellent mobility while providing powerful compression to strategic muscles groups.

DURABILITY

10 times stronger than steel, chlorine resistant and with shape-memory, Carbon Fiber is a powerful material with extraordinary qualities. Tech suits made from this fabric are highly resilient and are not altered by use in pool water for a longer-lasting lifespan.

EVERYTHING YOU LOVED ABOUT THE ST 2.0 IS NOW LIGHTER, FASTER, **GREENER.**

Meet the world's first racing suit made of recycled fabrics and experience enhanced performance while contributing to the reduction of waste at every stroke.

ST NEXT

THE FIRST EVER FINA-APPROVED RACING SUIT MADE WITH RECYCLED FABRICS!

arena proudly introduces the next generation of competitive swimsuit. The first brand worldwide to ever launch a sustainable racing suit: the ST NEXT. Compared to the previous ST 2.0, this re-envisioned version is 20% lighter, which results in less water absorption and drag. The specific characteristics of the new fabric provide a longer-lasting compression and, consequently, greater durability. In addition to its performance, ST NEXT utilizes sustainable materials. Over 60% of the yarns used in its fabrication come from pre and post-consumer waste, which would have otherwise been destined for landfills. The FINA approved status of the ST NEXT makes it the first of its kind to be suitable for competitions.

Reinforced shoulder straps for better **COMFORT AND DURABILITY**

ERGONOMIC CONSTRUCTION with low profile seams for perfect fit

* LONG TORSO SIZES (L) ARE ONLY AVAILABLE FOR POWERSKIN PRIMO

HOW TO TAKE MEASUREMENTS (VALID FOR ALL POWERSKIN RACING SECTION)

A - Chest: Take the measurement over the fullest part of your bust.
B - Waist: Measure around the narrowest part of your waistline.

C - Hips: Measure around the fullest part of your hips.
D - Torso loop: In a loop, measure from the highest part of the shoulder, beneath the crotch and then back to the starting point.

(**) Body measurements and corresponding sizes are to be considered as a general guideline. We strongly recommend that any racing suit should be tried on by each swimmer before choosing the appropriate size, based upon individual preference in terms of compression. Swimming stroke and distance may also be key factors in the suit selection.

OPEN WATER WETSUIT

THE NEW POWERSKIN THUNDER WETSUIT

THE ESSENCE OF WETSUITS.

LOW-PROFILE NECKLINE
prevents chaffing for added comfort

Thick 4mm #38 Yamamoto limestone neoprene on the core allows for **MAXIMUM BUOYANCY**

#38 Yamamoto limestone neoprene on the legs is 3mm thick for an ideal **COMBINATION OF FLEXIBILITY AND BUOYANCY**

IMPROVED ZIPPER CLOSURE
provides a secure seal

Standard **BOTTOM-UP ZIPPER** for ease of use

2mm thin #38 Yamamoto limestone neoprene covers the arms for **GREATER FLEXIBILITY**

MEET THE WETSUIT THAT IS FITTED WITH CORE TECHNOLOGIES TO PROVIDE THE BEST MIX OF BUOYANCY, FLEXIBILITY, THERMAL PROTECTION AND COMFORT.

The POWERSKIN THUNDER was conceived in an effort to understand the essence of what open water swimming beginners need from a wetsuit. We utilized our proven legacy and experience in the sport to provide novices with a clear-cut solution to their racing needs. Equipped with all the essentials, it is made entirely from eco-friendly, durable Yamamoto limestone neoprene and coated with Nano SCS for an efficient glide through the water.

The distribution of neoprene density minimizes resistance during the swimmer's stroke, and provides buoyancy in all the right areas for an optimal body position. The thickest 4mm layer is placed within the core for added stability, while the upper chest and legs are supported with a lighter layer of 3mm neoprene for thermal protection. The shoulders and arms experience greater freedom of movement thanks to the 2mm neoprene thickness coverage.

WETSUIT RANGE

| | STORM | THUNDER |
|--|-------|---------|
| LIMESTONE NEOPRENE DEVELOPED WITHOUT THE USE OF OLL | X | X |
| NEW COLLAR AND NECKLINE DESIGN FOR ADDED COMFORT AND ZERO CHAFING | X | X |
| STRATEGIC DISTRIBUTION OF NEOPRENE THICKNESSES TO ENSURE OPTIMAL BUOYANCY AND FREEDOM OF MOVEMENT | X | X |
| ULTRA-THIN 1,5 MM YAMAMOTO NEOPRENE ALONG THE ARMS FOR OPTIMAL FLEXIBILITY AND MOVEMENT | X | |
| IMPROVED ZIPPER CLOSURE FOR A TIGHTENED SEAL | X | X |
| STANDARD BOTTOM-UP ZIPPER DESIGN FOR EASE OF USE | X | X |
| DOUBLE LAMINATED ULTRA-THIN NEOPRENE PANLES ALONG THE FOREARMS FOR HEIGHTENED AWARENESS OF THE WATER DURING THE CATCH AND PULL PHASES OF THE STROKE. | X | |
| NANO SCS COATING TO REPEL WATER AND REDUCE DRAG | X | X |
| DOUBLE-BLIND STITCHING AND GLUE CONSTRUCTION FOR COMPLETELY WATERPROOF SEAMS | X | X |
| APPROVED BY FINA, WORLD TRIATHLON (ITU), IRONMAN & USAT | X | X |
| AIRLOCK TECHNOLOGY FOR A PERFORATED FABRIC THAT TRAPS AIR DURING THE LAMINATION PROCESS | X | |
| INTERNALLY LAMINATED NEOPRENE WITH POWERSKIN CARBON FIBER WOVEN FABRIC | X | |
| 1.5 MM THICK YAMAMOTO NEOPRENE ON THE ANKLE AND WRIST CUFFS FOR ENHANCED ELASTICITY | X | |
